

Do you want to stay connected with your chronically ill patients at home?

Then the Gippsland PHN **Remote Patient Monitoring** program is for you.

The Gippsland PHN Remote Patient Monitoring program allows patient to regularly report on their chronic health symptoms and vital signs using a mobile app, LifeguardMobile.

Supported by a model of care that drives safety and quality, and where patient information is safely and seamlessly uploaded in real-time to their healthcare provider for early intervention.

To find out how Remote Patient Monitoring can work for your patients, visit www.gphn.org.au
