

Do you have a chronic health condition or care for someone who does?

Ever worry about knowing what signs or symptoms are normal?

Then the Gippsland PHN Remote Patient Monitoring program is for you.

The Gippsland PHN Remote Patient Monitoring program allows you, a family member or friend, to regularly report health symptoms and vital signs using a mobile app, LifeguardMobile.

Supported by a model of care that drives safety and quality, and where patient information is safely and seamlessly uploaded in real-time to their healthcare provider for early intervention.

To find out how Remote Patient Monitoring can work for you, a family member or friend, speak to your healthcare provider today.
