

GIPPSLAND

AFTER HOURS TELEHEALTH

CONSULTATION SERVICE

The After Hours Telehealth Consultation Service provides medical services and support over video and telephone to ensure everyone can receive treatment when they need it.

HealthAccess looks forward to partnering with Gippsland PHN, local residents of Gippsland and Health providers to support the after-hours medical needs of the communities.

Our dedicated, Australian based GP generalist clinicians are specialists in rural and remote health and will ensure the delivery of comprehensive, quality, culturally inclusive care when their local GP is not available.

All GP type patient presentations will be assessed and managed in a timely manner, via video link or telehealth call and prescribed medical treatments, X-rays or blood tests ordered as and when clinically appropriate.

We will always encourage patients to interact with their regular GP, and to advise them of any treatment provided. A treatment summary will also be provided, with patient consent to regular treating GP.

The service will operate from 6-10pm weeknights, 12pm – 8pm Saturdays, 8am – 4pm Sunday and Public Holidays.
