

Menopause

Saturday 14 March 2026

Menopause: the good, the bad and the challenging

This one-day live online workshop brings together a diverse panel of specialists in menopausal medicine to explore topics and case studies, and to discuss the latest evidence-based approaches.

Participants will gain key insights into the challenges and management strategies associated with the perimenopause, menopause and associated conditions, empowering you to enhance patient care and outcomes.

WHO SHOULD PARTICIPATE?

This course is targeted at General Practitioners, Physician and Obstetrics and Gynaecology consultants and trainees, and other health professionals interested in women's health.

TOPICS

- GP Perspective
- General Menopause
- Menopausal Hormone Therapy
- Non-Hormonal Medication
- Early Menopause
- Menopause and Cancer
- Turner Syndrome
- Osteoporosis
- Post Menopausal Cardiovascular Disease
- Genitourinary Syndrome of Menopause

MAIN FACILITATOR

Professor Beverley Vollenhoven AM is a gynaecologist with a subspecialty qualification in reproductive endocrinology and infertility. Her areas of expertise include menopause, infertility, polycystic ovarian syndrome, eating disorders, paediatric and adolescent gynaecology, and uterine fibroids.

She is the Carl Wood Chair of the Department of Obstetrics and Gynaecology at Monash University and the Director of Gynaecology and Research within the Women's and Newborn Program at Monash Health.
