

MyMedicare

Why should patients register with a MyMedicare practice?

- MyMedicare supports practices to provide preventive care and early treatment allowing patients to stay active and healthier in the community for longer.
- It promotes having an established relationship with a nominated GP/practice for seamless, integrated and continuous care; and where patient needs are understood and prioritised.
- It reduces fragmentation of care caused by multiple service providers.
- It funds longer telehealth appointments that will benefit people with disabilities or mobility issues that find it difficult to get to face-to-face appointments.
- It supports the delivery of quality and continuous care to residents in aged care facilities.
- Patients deserve to have a GP/practice that knows their history.
