rural@racgp.org.au

Point-of-care ultrasound is an increasingly affordable and efficient diagnostic tool in general practice, particularly in areas with limited access to specialist services.

Why attend

The full-day workshop will increase your understanding of the applications of point-of-care ultrasound in the diagnostic process.

Experienced rural doctors and sonographers will guide you through the diverse applications of point-of-care ultrasound in primary care services using advanced, high-end mobile ultrasound equipment provided by our sponsor, GE Healthcare.

Capped at 30 participants, you'll rotate through six stations:

- eFast
- deep venous thrombosis
- heart and lung ultrasound
- intravenous line placement and foreign object retrieval
- musculoskeletal soft tissue
- first trimester transabdominal obstetric ultrasound.

The workshop is a CPD Accredited Activity under the RACGP CPD Program (eligible for 40 points) and is approved for all categories of the Rural Procedural Grants Program.
