

Diabetes in Primary Care: A Practical Webinar Series for GPs

Insulin in Practice

 Tuesday 20th October

 7.30pm - 8.45pm

Who should attend:

General Practitioners and members of the general practice team involved in diabetes care.

Each webinar will attract 1 hour of RACGP CPD (Educational Activity No. 1600692)

Register at:

<https://nadc.net.au/primarycare-gp/>

Developed in partnership between the **Alfred Care Group, Bayside Health**, and the **South Eastern Melbourne Primary Health Network (SEMPHN)**, and supported by the **National Association of Diabetes Centres (NADC)**, the series provides practical, case-based education aligned with Australian guidelines and the realities of general practice.

Across the 10-part series, experienced endocrinologists and multidisciplinary experts will cover the full spectrum of type 2 diabetes management—from early detection and lifestyle intervention to complex pharmacotherapy, technology, and prevention and management of complications including cardiovascular disease, kidney disease, foot disease, frailty and atypical diabetes.

Presenter:

Dr Shoshana Sztal-Mazer –Endocrinologist, Alfred Care Group, Bayside Health

Multidisciplinary Panel:

Emily Clarke – Dietitian, Caulfield Community Health - Bayside Health

Aishlin Whitehand– Diabetes Nurse Educator, Alfred Care Group – Bayside Health

A/Prof Roy Rasalam– General Practitioner, Diabetes Connecting Care Clinic, Alfred Care Group - Bayside Health

Chair:

Professor Anthony Russell – Director, Endocrinology and Diabetes, Alfred Care Group

This session will focus on:

- When to initiate insulin in type 2 diabetes
- How to initiate and titrate insulin in type 2 diabetes
- What to do with other glucose lowering agents when initiating insulin
- Sick day management for type 2 diabetes
